

Participation Assignment

CHEM 1090-General Chemistry I

Name:

#12

Section: 33, TR

Due Date: Thursday 2/14/2019

1. The first reaction in the steam methane reforming process is as follows:

Write the chemical equation and the standard enthalpy value for the reaction of 2 moles of methane, CH_4 .

2. The reverse of the reaction in #2 is sometimes called a methanation reaction. Write the chemical equation for the reverse reaction and also the standard enthalpy value for the production of 1 mole of methane.

3. Calculate the standard enthalpy of reaction for the following reaction:

Using only the following information:
